

September 28th, 2017

Dear Families,

We are pleased to launch the Sunnyside App! Hopefully, this is one of the last pieces of paper you will receive from the school this year.

Our App features all of the relevant information you will need for your child this year and I will primarily be communicating through this medium as we move forward.

Below are directions on how to download the app. If you are having any difficulty with this please feel free to contact me and we will work through it.

If you have an existing account with appazur (high school sibling) you can use the same credentials to login to the Sunnyside app.

Sunnyside App:

On your Computer:

1. Go to <https://sunnyside.appazur.com/app/> to view the desktop computer version

On your personal Device:

1. Download the "Sunnyside App" in your apple app store, or google play store depending on your device.

Once you have the App:

2. Create a new profile by selecting *sign in – personal account – sign up (under new user)*
3. On the left-hand side, you will see a menu where you can select Classes or Groups.
4. Once your account is created, select the gear in the top right-hand corner and select any classes or Groups you are interested in following
5. Once selected you will then begin receiving announcements from our class, school and any other groups you subscribe to!

Once selected you will then begin receiving announcements from our class, school and any other groups you subscribe to. We will be adding groups as the year progresses and I will announce these as they go online.

Please feel free to contact us if you have any questions.

Sincerely,
Mr. Rawji
